## in the Scottish Local Government election

Idox Elections: Delivering modern democracy

In May 2017, Idox supplied an effective eCounting system to the Scottish Government for the second time.

The system successfully supported all 32 Scottish councils taking part in the local government election under the country's Single Transferable Vote (STV) system.

Idox is a chosen partner to deliver Scottish Local Government elections and by-elections until 2021.

1 The people

2 The technology

3 The count

4,110,790

the number of Scots eligible to vote in the election

1,227

the number of councillors elected

700

the number of PCs required

249

the number of scanners ordered to handle the eCount

70

the number of servers deployed during the project

440km

the length of paper scanned during the counting process

1.9 million

the number of ballot papers processed by the eCounting system

351

the number of wards within the local councils taking part in the election

09.15am

first count completed by Orkney demonstrating the speed and accuracy of the eCount software
